Overview
Gain an insight into the health of your System Center Operations Manager environment by proactively diagnosing issues and risks, reviewing your results online, and receiving continuous updates to best practice guidance.

Analyze your environment against best practices developed by Microsoft technology experts, then work with a Microsoft engineer to understand your results and develop a plan that limits risk and improves your environment.

Objectives
• Gain an expert’s perspective on what issues you should address first.
• Optimize your environment based on Microsoft best practices to prevent issues before they arise.
• Establish a baseline so you can track your progress throughout the year.

Methodology
Setup your assessment
Prior to working with your Microsoft engineer, you will setup your assessment and generate your first set of results.

Expert analysis
Your Microsoft engineer will analyze your results, help you understand each issue identified and ensure that you have the right information to fix the issue.

Persist and improve
Re-assess your environment on a monthly basis using the latest updates to continually drive improvement throughout the year.

Key Takeaways
• Holistic recommendations that enable you to improve your people, process and technology.
• Expert analysis and a prioritized remediation guidance on what to fix first.
• Regular updates to guidance and features.
• In-depth review of findings with subject matter expert.

Scope
Assess the management group, server health, and data layer health of your Operations Manager environment.

This assessment is available for on-premises or Azure VM (IaaS) based Operations Manager environments in a single management group.

Agenda
Welcome call
Occurs 2-4 weeks before delivery with your Microsoft Engineer and Technical Account Manager.

Setup and initial results
You complete the assessment setup and initial result gathering prior to your analysis.

Engineer led analysis
Your Microsoft engineer will analyze your results and lead the in-depth review of your findings during a one-day remote meeting in addition to two onsite days.

Your engineer will work with you to develop a prioritized list of recommendations.

Close out meeting
Finalize and deliver your results.
