RAP as a Service PLUS for Lync/Skype for Business Server

**Overview**
Gain an insight into the health of your Skype for Business Server environment by proactively diagnosing issues and risks, reviewing your results online, and receiving continuous updates to best practice guidance.

Analyze your environment against best practices developed by Microsoft technology experts, then work with a Microsoft engineer to understand your results and develop a plan that limits risk and improves your environment.

**Objectives**
- Gain an expert’s perspective on what issues you should address first.
- Optimize your environment based on Microsoft best practices to prevent issues before they arise.
- Establish a baseline so you can track your progress throughout the year.

**Methodology**

**Setup your assessment**
Prior to working with your Microsoft engineer, you will setup your assessment and generate your first set of results.

**Expert analysis**
Your Microsoft engineer will analyze your results, help you understand each issue identified and ensure that you have the right information to fix the issue.

**Persist and improve**
Re-assess your environment on a monthly basis using the latest updates to continually drive improvement throughout the year.

**Key Takeaways**
- Holistic recommendations that enable you to improve your people, process and technology.
- Expert analysis and a prioritized remediation guidance on what to fix first.
- Regular updates to guidance and features.
- In-depth review of findings with subject matter expert.

**Scope**
Assess the hardware configuration, performance, and call data of your Lync/Skype for Business Server environment.

This assessment is available for a single Lync/Skype for Business Server environment with up to 85 servers and 150,000 users on supported versions of Lync Server and Skype for Business Server.

**Agenda**

**Welcome call**
Occurs 2-4 weeks before delivery with your Microsoft Engineer and Technical Account Manager.

**Setup and initial results**
You complete the assessment setup and initial result gathering prior to your analysis.

**Engineer led analysis**
Your Microsoft engineer will analyze your results and lead the in-depth review of your findings during a one-day remote meeting in addition to two onsite days.

Your engineer will work with you to develop a prioritized list of recommendations.

**Close out meeting**
Finalize and deliver your results.
