Offline Assessment for SharePoint Server

**OFFLINE**

*Duration:* 12 month subscription | 4 Days Onsite

![Image showing the offline assessment process](image-url)

The Offline Assessment for SharePoint Server is a proactive service delivered by a Microsoft accredited engineer to diagnose potential issues with your on-premises SharePoint environment. This service is recommended for customers with high privacy restrictions and compliance processes in which the data must remain at their facilities.

### OUTCOMES

The SharePoint Server assessment provides you with deep knowledge transfer, a recommendation report, and a plan of action to improve your SharePoint environment based on best practices and expert knowledge.

1. **COMPREHENSIVE**
   - Gain deeper understanding of key technology, people, and process areas in your SharePoint Server environment

2. **EXPERT RESULTS**
   - SharePoint Configuration
   - SharePoint Topology
   - SharePoint Health Analyzer
   - SharePoint Data Integrity
   - Event Log Analysis
   - Operational Excellence

3. **ACTION PLAN**
   - Knowledge transfer with a remediation plan.

### CAPABILITIES

Gain valuable insight into the health of your SharePoint deployment by proactively diagnosing issues and risks, reviewing your results, and receiving in-depth guidance to improve the health, performance, security, and stability of your SharePoint deployment.

- **HOLISTIC RECOMMENDATIONS**
  - Our recommendations are based on expert evaluation of people, process and technology.

- **CONTINUOUS IMPROVEMENT**
  - Use your 1 year subscription to watch your results improve as you act on recommendations and fix issues in your environment.

- **ALWAYS CURRENT**
  - Thousands of Microsoft technology experts continually provide updates to our analysis and guidance.

This service supports a single SharePoint 2013, SharePoint 2016 or SharePoint 2019 farm, with up to 30 servers (including SQL Servers), and up to 50,000 webs.
Deliverables include:

- Comprehensive knowledge transfer of issues found
- Remediation plan
- Technical Findings report

Key Benefits:

- Complete data privacy
- Onsite delivery with a Microsoft accredited engineer
- Assessment results available with the offline client
- Reduce support costs by exposing configuration and operational issues before they affect your business
- Re-assess your environment to track progress
- Offline client tool license for 12 months
- Assessment tooling and access to regular updates to best practice guidance
