**Overview**

RAP as a Service for System Center Operations Manager is a proactive service delivered by a Microsoft accredited engineer to diagnose potential issues with your on-premises or Azure VM (IaaS) based Operations Manager environment. This service is available for Operations Manager environments running System Center Operations Manager 2007 R2, System Center 2012 Operations Manager, System Center 2012 SP1 Operations Manager, System Center 2012 R2 Operations Manager System Center 2016 Operations Manager, System Center Operations Manager Branch 1801, and System Center Operations Manager Branch 1807. System Center Operations Manager 2007/SP1 is not supported. The environment must be in a single Management Group to include one or more Management Server(s), one Operations Manager Database and one Operations Manager Data Warehouse.

**What is RAP as a Service?**

This is a delivery experience to enable you to assess your environment at your convenience. The data is collected remotely allowing you to maintain privacy and run the assessment on your own schedule. Submission of data through the cloud and viewing results on our online portal uses encryption to help protect your data. This enables you to view your results almost immediately. A Microsoft accredited engineer will review the findings, provide recommendations and knowledge transfer, and build a remediation plan with your staff and your Technical Account Manager (TAM).

**An Online Experience**

Data submission to Microsoft online servers and displaying your results on the online portal uses encryption to help protect your data. Your data is analyzed using our RAP expert system. The results remain available throughout the licensed period of your assessment. You can also re-assess your environment at any time using the updated best practice guidance that is made available to subscribers on a regular basis. Your IT staff or other teams within your organization can be granted access to the results in order to collaborate effectively on the outcome of the assessment.

**Practical Recommendations**

RAP as a Service for System Center Operations Manager collects information on the key technology, people, and process areas in your environment and analyzes this information against best practices obtained from over thousands of customer assessments. Solutions for each of the issues are identified and articulated in the Technical Findings report. All critical and important issues are explained by the Microsoft accredited engineer and a remediation plan is provided as one of the key deliverables.
RAP as a Service

The key technology, people, and process areas in your System Center Operations Manager environment are analyzed against best practices established from over thousands of customer assessments.

Key Focus Areas

- Management Server(s) Health – Specifications, Event Log, Performance
- Data Layer Health – Instance(s), Database(s), SQL Errors, Table(s), Grooming, Backup
