RAP as a Service Plus for Windows Server Hyper-V

Overview

RAP as a Service Plus for Windows Server Hyper-V is a proactive service delivered by a Microsoft accredited engineer to diagnose potential issues with your environment with an additional two days onsite focusing on education and remediation planning. This service is available for up to 64 Hyper-V servers running Windows Server 2008/R2, Windows Server 2012/R2 and Windows Server 2016 including not more than one Hyper-V Cluster. SCVMM Infrastructure will also be analyzed and reviewed if it is being used in the Hyper-V environment.

What is RAP as a Service Plus?

This is a delivery experience to enable you to assess your environment at your convenience. The data is collected remotely allowing you to maintain privacy and run the assessment on your own schedule. Submission of data through the cloud and viewing results on our online portal uses encryption to help protect your data. This enables you to view your results almost immediately. A Microsoft accredited engineer will review the findings, provide recommendations and plan the two-day follow up onsite visit which will focus on knowledge transfer, and build a remediation plan with your staff and your Technical Account Manager (TAM).

An Online Experience

Data submission to Microsoft online servers and displaying your results on the online portal uses encryption to help protect your data. Your data is analyzed using our RAP expert system. The results remain available throughout the licensed period of your assessment. You can also re-assess your environment at any time using the updated best practice guidance that is made available to subscribers on a regular basis. Your IT staff or other teams within your organization can be granted access to the results in order to collaborate effectively on the outcome of the assessment.

Practical Recommendations

RAP as a Service Plus for Windows Server Hyper-V collects information on the key technology, people, and process areas in your environment and analyzes this information against best practices obtained from over thousands of customer assessments. Solutions for each of the issues are identified and articulated in the Technical Findings report. All critical and important issues are explained by the Microsoft accredited engineer and a remediation plan is provided as one of the key deliverables.

Key Benefits

- Online plus a scoped customized onsite delivery with a Microsoft accredited engineer
- Assessment results available online
- Easily share results with your IT staff and others in your organization
- Re-assess your environment to track progress
- Reduce support costs by exposing configuration and operational issues before they affect your business
- Flexible scheduling options
- Access to best practice updates for one year with an active Premier Support contract
- Adapted hands-on learning
- Optimization workshop
RAP as a Service Plus

The key technology, people, and process areas in your Hyper-V environment are analyzed against best practices established from over thousands of customer assessments.

**Key Focus Areas**

- Hyper-V Server Configuration
- Virtual Machines Configuration
- Hyper-V Cluster Configuration
- Hyper-V Network Configuration
- Hyper-V Storage Configuration
- SCVMM Configuration
- Performance Analysis
- Operational Excellence

**Follow-on Experience**

Persistence is now built-in with this service, allowing you to re-assess your environment multiple times to track progress, get updates to newly released best practice guidance, obtain new online portal features, and interact with an exclusive online community.

**Deliverables Include**

- Assessment tooling, multiple submissions, and access to the online portal
- Regular updates to best practice guidance and online portal features
- Use of the online portal and tools for one year with an active Microsoft Premier Support contract
- Optimization workshop onsite which includes:
  - Knowledge transfer of issues found with a customized experience using adapted hands-on learning material to include topics of your choice based on Key Focus Areas
  - A full remediation plan
  - Technical Findings report
