RAP as a Service Plus for Dynamics CRM

An online experience with an onsite component

Gain valuable insight into the health of your Dynamics CRM environment by proactively diagnosing issues and risks, reviewing your results online, and receiving continuous updates to best-practice guidance.

Key Benefits
- An online plus a scoped customized onsite delivery with a Microsoft accredited engineer
- Assessment results available online
- Easily share results with your IT staff and others in your organization
- Re-assess your environment to track progress
- Reduce support costs by exposing configuration and operational issues before they affect your business
- Flexible scheduling options
- Access to best practice updates for one year with an active Premier Support contract
- Adapted hands-on learning
- Optimization workshop

Overview

RAP as a Service Plus for Dynamics CRM is a proactive service delivered by a Microsoft accredited engineer to diagnose potential issues with your environment with an additional two days on-site focusing on education and remediation planning. This service is available for a single deployment of Dynamics CRM 2013, Dynamics CRM 2015 or Dynamics CRM 2016 with up to five Organizations and up to five Microsoft Dynamics CRM application servers.

What is RAP as a Service Plus?
This is a delivery experience to enable you to assess your environment at your convenience. The data is collected remotely allowing you to maintain privacy and run the assessment on your own schedule. Submission of data through the cloud and viewing results on our online portal uses encryption to help protect your data. This enables you to view your results almost immediately. A Microsoft accredited engineer will review the findings, provide recommendations and plan the two-day follow up onsite visit which will focus on knowledge transfer, and build a remediation plan with your staff and your Technical Account Manager (TAM).

An Online Experience
Data submission to Microsoft online servers and displaying your results on the online portal uses encryption to help protect your data. Your data is analyzed using our RAP expert system. The results remain available throughout the licensed period of your assessment. You can also re-assess your environment at any time using the updated best practice guidance that is made available to subscribers on a regular basis. Your IT staff or other teams within your organization can be granted access to the results in order to collaborate effectively on the outcome of the assessment.

Practical Recommendations
RAP as a Service for Dynamics CRM collects information on the key technology, people, and process areas in your environment and analyzes this information against best practices obtained from over thousands of customer assessments. Solutions for each of the issues are identified and articulated in the Technical Findings report. All critical and important issues are explained by the Microsoft accredited engineer, and a remediation plan is provided as one of the key deliverables.
**RAP as a Service Plus**

**Collect**
- Collecting data remotely helps you maintain privacy, and allows you to run the assessment on your schedule.

**Submit**
- Submitting data through the cloud using encryption to help protect your data.

**View**
- You have access to the results based on our RAP expert system-based analysis.

**Advise**
- Our Microsoft accredited engineers review the RAP findings, provide recommendations, and build a remediation plan with you.

**Persist**
- Breakthrough follow-on experience – You can re-assess to track progress, get updates to the IP and platform, and interact with an exclusive community.

---

**Two Day Customizable Onsite**

Improved ability to remediate, prioritize and plan with adapted hands-on learning and limited remediation work within the boundaries of change control.

---

**Key Focus Areas**
