RAP as a Service Plus for SQL Server is a proactive service delivered by a Microsoft accredited engineer to diagnose potential issues with your on-premises or Azure VM or Amazon EC2 (AWS) SQL Server environments. This service is available for a single server or failover cluster running SQL Server 2008, SQL Server 2008 R2, SQL Server 2012, SQL Server 2014, SQL Server 2016 or SQL Server 2017 instances. Windows Server 2008, Windows Server 2008 R2, Windows Server 2012, Windows Server 2012 R2, Windows Server 2016 Failover Cluster or standalone server installations are supported.

The RAP as a Service for SQL Server provides you with a recommendation report and plan of action to improve your SQL Server environment based on best practices from Microsoft Experts.

**01 CONTROL**
You control where your data is stored and easily share results with your IT staff and others in your organization.

**02 EXPERT RESULTS**
Solutions for each of the issues are identified and articulated in recommendations on the Azure Log Analytics portal.

**03 ACTION PLAN**
Our Microsoft accredited engineers review the RAP findings, provide recommendations and build a remediation plan with you.

**OUTCOMES**
Gain valuable insight into the health of your SQL Server deployment by proactively diagnosing issues and risks, reviewing your results, and receiving guidance to improve the health, performance and stability of your SQL Server deployment.

**CAPABILITIES**
- **HOLISTIC RECOMMENDATIONS**
  Our recommendations are based on expert evaluation of people, process and technology.
- **CONTINUOUS IMPROVEMENT**
  Use your 1-year subscription to watch your results improve as you act on recommendations and fix issues in your environment.
- **ALWAYS CURRENT**
  Thousands of Microsoft technology experts continually provide updates to our analysis and guidance.

**Online**
Duration: 12 month subscription | 1 Day engineer review
